Get Expired Option Contracts Plus

GET /expired-instruments/option/contract

API to retrieve expired option contracts for an underlying instrument on a specified expiry date. This API is useful for traders and analysts who want to analyze the historical performance of options and their underlying assets. By providing the instrument key and expiry date, users can obtain detailed information about the expired options, including their trading symbols, strike prices, lot sizes, and other relevant attributes.

Request

```
curl --location 'https://api.upstox.com/v2/expired-instruments/option/contract?
instrument_key=NSE_INDEX%7CNifty%2050&expiry_date=2024-11-27' \
--header 'Content-Type: application/json' \
--header 'Authorization: Bearer {your_access_token}' \
--header 'Accept: application/json'
```

For additional samples in various languages, please refer to the Sample code section on this page.

Query Parameters

instrument_key

REQUIRED

Required

TYPE

string

DESCRIPTION

Key of an underlying instrument. For the regex pattern applicable to this field, see the Field Pattern Appendix.

expiry_date

REQUIRED

Required

TYPE

string

DESCRIPTION

Expiry date for which expired option contracts are required in format: `YYYY-MM-DD`.

Responses

200 4XX

Response Body

```
    "segment": "NSE_FO",
    "exchange": "NSE",
    "expiry": "2025-04-17",
    "instrument_key": "NSE_FO|47983|17-04-2025",
    "exchange_token": "47983",
    "trading_symbol": "NIFTY 20400 PE 17 APR 25",
    "tick_size": 5,
    "lot_size": 75,
    "instrument_type": "PE",
    "freeze_quantity": 1800,
    "underlying_key": "NSE_INDEX|Nifty 50",
    "underlying_type": "INDEX",
    "underlying_symbol": "NIFTY",
    "strike_price": 20400,
    "minimum_lot": 75,
    "weekly": true
  },
  {
    "name": "NIFTY",
    "segment": "NSE_FO",
    "exchange": "NSE",
    "expiry": "2025-04-17",
    "instrument_key": "NSE_FO|47982|17-04-2025",
```

status

TYPE

`string`

DESCRIPTION

A string indicating the outcome of the request. Typically `success` for successful operations.

data

TYPE

`object`

DESCRIPTION

Data object for expired option contracts.

data[].name

TYPE

`string`

DESCRIPTION

The name of the option.

`data[].segment`

TYPE

`string`

DESCRIPTION

The market segment of the option.
Possible values: `NSE_EQ`, `NSE_INDEX`, `NSE_FO`, `NCD_FO`, `BSE_EQ`, `BSE_INDEX`, `BSE_FO`, `BCD_FO`, `MCX_FO`, `NSE_COM`

`data[].exchange`

TYPE

`string`

DESCRIPTION

Exchange to which the instrument is associated.
Possible values: `NSE`, `BSE`, `MCX`.

`data[].expiry`

TYPE

`string`

DESCRIPTION

Expiry date (for derivatives). Date format is `YYYY-MM-dd`.

`data[].instrument_key`

TYPE

`string`

DESCRIPTION

Also refer to an **expired_instrument_key** for expired future contract. This is combination of instrument_key and expiry date. For the regex pattern applicable to `expired_instrument_key` field, see the Field Pattern Appendix.

`data[].exchange_token`

TYPE

`string`

DESCRIPTION

The exchange-specific token for the option.

`data[].trading_symbol`

TYPE

`string`

DESCRIPTION

The symbol used for trading the option.
Format: `<underlying_symbol> <strike_price> <CE/PE> <expiry in dd MMM yy>`

data[].tick_size

TYPE

`number`

DESCRIPTION

The minimum price movement of the option.

data[].lot_size

TYPE

`number`

DESCRIPTION

The size of one lot of the option.

data[].instrument_type

TYPE

`string`

DESCRIPTION

The type of the option instrument,
Possible values: `CE`, `PE`

data[].freeze_quantity

TYPE

`number`

DESCRIPTION

The maximum quantity that can be frozen.

data[].underlying_key

TYPE

`string`

DESCRIPTION

The `instrument_key` for the underlying asset.

data[].underlying_type

TYPE

`string`

DESCRIPTION

The type of the underlying asset, Possible values: `COM`, `INDEX`, `EQUITY`, `CUR`, `IRD`.

data[].underlying_symbol

TYPE

`string`

DESCRIPTION

The symbol of the underlying asset.

data[].strike_price

TYPE

`number`

DESCRIPTION

The strike price for the option.

data[].minimum_lot

TYPE

`number`

DESCRIPTION

The minimum lot size for the option.

data[].weekly

TYPE

`boolean`

DESCRIPTION

Indicates if the option is weekly.

Sample Code

Get Expired Option Contracts for given instrument with expiry date

Curl | Python | Node.js | Java | PHP | Python SDK | Node.js SDK | Java SDK

```python
import requests

url = 'https://api.upstox.com/v2/expired-instruments/option/contract?
instrument_key=NSE_INDEX%7CNifty%2050&expiry_date=2024-11-27'
headers = {
    'Content-Type': 'application/json',
    'Authorization': 'Bearer {your_access_token}',
    'Accept': 'application/json'
}

response = requests.get(url, headers=headers)

# Check the response status
if response.status_code == 200:
    # Do something with the response data (e.g., print it)
    print(response.json())
else:
```

```
    # Print an error message if the request was not successful
    print(f"Error: {response.status_code} - {response.text}")
```

NOTE

- This API is specifically designed for expired option contracts. For current or active contracts, please refer to either Instrument json or the Get Option Contracts API.
- Before using this API, ensure to check the Get Expiries API to obtain the available expiry dates for the underlying instrument.
